PROJECTS

AURA

Developed an end-to-end anonymous student grievance chatbot using Python Flask, MongoDB, and NLP for automated sentiment analysis and issue categorization. Engineered a zero-trace anonymity protocol to protect student identities, facilitating a 40% increase in reporting and reducing administrative response latency by 30% for over 500+ users

RecruitAI

Built a full-stack recruitment platform using React JS, Python Flask, and MySQL, integrating Claude AI with TF-IDF and Cosine Similarity algorithms for automated resume screening. Reduced manual screening time by ~80%, achieving match score accuracy of 85%+. Features dual portals for recruiters and candidates with real-time AI scoring, skill extraction, and automated shortlisting.
